

地质学珠峰班 (基础学科拔尖学生培养计划 2.0) 培养方案

专业名称与代码：地质学 070901

专业培养目标：本专业面向地球系统科学发展趋势、国家战略需求和社会民生发展，坚持立德树人根本任务，创新地质学人才培养理念和模式，打造地质学拔尖人才培养高地，培养具有坚实的数理化生基础、深厚的人文素养、扎实的实践能力和卓越的创新能力，兼具家国情怀与全球视野，谋求人与自然和谐发展的未来地球科学领域的学术领军人才。

专业毕业要求：

1. 思想道德与人文素养：具有坚定的政治立场、良好的道德修养和正确的人生观与价值观；具有强烈的家国情怀和社会责任感，具备艰苦朴素、求真务实的地质专业精神；修学人文社会科学和艺术类课程，具有良好的人文艺术修养。

2. 理科基础与思维能力：具有较坚实的数学、物理、化学、生物学和信息科学基础和分析解决问题的能力，具有较强的逻辑思维和批判性思维能力。

3. 专业知识与技能：具备地球系统科学思维，掌握地球物质科学、地球化学、地球物理学、地球观测、地球表层系统、地球环境与生命演化、行星科学等领域专业知识体系，具有在地球科学各领域从事研究工作的基本知识和技能。

4. 科研与实践能力：了解学科前沿与发展趋势，具备较强的综合分析能力；掌握野外地质工作的基本方法，会使用常用的分析仪器并获取数据，了解地球科学领域常用的计算机模拟技术；熟练掌握至少一门计算机语言的编程技术，能熟练地进行信息获取、处理和表达，具有大数据获取及分析的技能，具备从事科学研究的能力和开展科研活动的经历。

5. 国际视野与交流能力：具备全球视野和较强的国际交流能力，具有较流利的外语听、说、读、写能力，了解地球科学国际前沿方向和发展趋势；具备团队合作能力及一定的组织管理能力。

6. 自主学习与创新意识：具备终身学习意识和较强的自主学习能力，能够根据自身发展和社会需求积极开展自主学习；具有强烈的创新意识，在了解学科前沿、国家目标及国际形势的基础上，积极开展创新性实践与探索。

毕业要求及实现途径:

序号	毕业要求	实现途径 (教学过程)
1	思想道德与人文素养: 具有坚定的政治立场、良好的道德修养和正确的人生观与价值观; 具有强烈的家国情怀和社会责任感, 具备艰苦朴素、求真务实的地质专业精神; 修学人文社会科学和艺术类课程, 具有良好的人文艺术修养。	①课堂教学: 思想道德修养与法律基础、马克思主义基本原理、毛泽东思想和中国特色社会主义理论体系、习近平新时代中国特色社会主义思想概论、体育、军事理论、大学语文、传统文化及中西方文化选修课、哲学基础、美学艺术类选修课 ②课外学习: 经典阅读与分享、人文讲座、网上主题团课、社会调查等
2	理科基础与思维能力: 具有较坚实的数学、物理、化学、生物学和信息科学基础, 具有较强的逻辑思维能力和分析解决问题的能力。	①课堂教学: 高等数学及地学应用、线性代数及地学应用、概率论与数理统计及地学应用、大学物理及地学应用、物理实验、普通生物学、大学化学及地学应用、化学实验、逻辑学等 ②课外学习: 大学生数学建模、物理实验创新设计、化学实验创新设计等竞赛活动及相关的系列科普活动
3	专业知识与技能: 具备地球系统科学思维, 掌握地球物质科学、地球化学、地球物理学、地球观测、地球表层系统、地球环境与生命演化、行星科学等领域专业知识体系, 具有在地球科学各领域从事研究工作的基本知识和技能。	①课堂教学: 地球系统科学导论 (学科基础课); 地球表层系统科学、深时地球环境与生命过程、深地科学等专业核心课; 大气科学概论、海洋学基础、环境科学导论、经济地理学、地球物理与空间信息导论、环境规划与管理等专业选修课; 北戴河和周口店野外地质实习、海内外经典地质路线实习 ②课外学习: “珠峰班论坛”、“地球系统科学论坛”、“名家论坛”等系列学术报告与交流
4	科研与实践能力: 了解学科前沿与发展趋势, 具备较强的综合分析能力; 掌握野外地质工作的基本方法, 会使用常用的分析仪器并获取数据, 了解地球科学领域常用的计算机模拟技术; 熟练掌握至少一门计算机语言的编程技术, 能熟练地进行信息获取、处理和表达, 具有大数据获取及分析的技能, 具备从事科学研究的能力和开展科研活动的经历。	①课堂教学: 北戴河和周口店野外地质实习、海内外经典地质路线实习、科技论文写作、地学现代技术、地球生物学前沿实验技术方法与实践、Python 语言程序课程设计、人工智能、古气候模拟、地质学虚拟现实方法与应用等相关课程 ②课外学习: 参观国家重点实验室; 二年级进入导师科研团队, 参与科研项目工作, 三年级开始自由组队开始创新课题研究; 参加 1-2 次国内外大型学术会议; 参加大学生科技论文报告会、大学生创新创业训练计划项目
5	国际视野与交流能力: 具备全球视野和较好的国际交流能力, 具有较流利的外语听、说、读、写能力, 了解地球科学	①课堂教学: 大学英语、部分学科基础课和专业核心课全英文教学、海外经典地质路线实习等 ②课外学习:

序号	毕 业 要 求	实现途径（教学过程）
	国际前沿方向和发展趋势；具备团队合作能力及一定的组织管理能力。	外文文献阅读、大学生英语竞赛、国外名家学术讲座、与本校留学生交流活动、世界名校访学交流等
6	自主学习与创新意识： 具备终身学习意识和较强的自主学习能力，能够根据自身发展和社会需求积极开展自主学习；具有强烈的创新意识，在了解学科前沿、国家目标及国际形势的基础上，积极开展创新性实践与探索。	①课堂教学： 以问题为导向的专业课程教学、以学生为主体的研讨式课堂教学 ②课外学习： 团队化科研训练、实践能力训练、社会调查、“赛恩斯”科技领航系列活动、“互联网+”、“挑战杯”等重大科创赛事

主干学科：地质学

专业核心课程：地球系统科学基础，地球表层系统科学，深时地球环境与生命演化，深地科学，地学现代技术，交叉学科课程等

主要专业实验：矿物、岩石手标本及薄片鉴定，古生物鉴定，构造分析，地球动力学模拟

主要实践性教学环节：地质认识实习（北戴河）、地质技能实习（周口店）、海内外经典地质路线教学实习、科研训练、毕业生产实习、毕业论文

毕业学分要求：173.5 学分

学制与学位：四年，理学学士

本专业学生可以辅修的其他专业：地理科学，地质工程、海洋科学、环境工程

相近专业：地球化学、地球物理学

Program for Geology Major

(National Training Base for Top-notch Students)

Specialty and Code: Geology 070901

Education Objective: In response to the development trend of Earth System Science, the national strategic needs and the development of people's livelihood, this major adheres to the fundamental task of talent cultivation in the field of geoscience. With innovations in education theory and methods, we are creating a highland for training top-notch students in geology. Our goal is focused on cultivating future leaders in geosciences who seek harmonious development between man and nature, and who have a solid foundation of mathematics, physics, chemistry and biology, profound humanistic quality, solid practical ability and outstanding innovation ability.

Graduation Requirements:

1. Moral & humanistic quality: Have a firm political stance and a strong sense of social responsibility; have good psychological and moral qualities and a correct outlook on life and values; obtain a certain degree of humanistic and artistic qualities; and have a professional spirit of hard work, simplicity, and pragmatism.

2. Scientific literacy and critical thinking: Have a solid foundation in mathematics, physics, chemistry, biology and information science and the ability to analyze and solve problems, with strong logical thinking and critical thinking ability.

3. Professional foundation: have a good view of Earth system science, establish a knowledge system of Earth materials, geochemistry, geophysics, Earth observation, Earth surface system, Earth environment and life evolution; master the basic theories and fundamentals of earth system science; have a mindset of earth system science; and have the basic knowledge and skills to engage in research work in various fields of Earth science.

4. Research and practical ability: Understand the frontier and development trend of geosciences, have strong comprehensive analysis ability; master the basic methods of field geological work, can use common analytical instruments and obtain data, understand the computer simulation technology commonly used in the field of earth science; proficiently master the programming technology of at least one computer language, can skillfully acquire, process and express information,

have the skills of big data acquisition and analysis, have the ability to engage in scientific research and the experience of carrying out scientific research activities.

5. International Vision and Intercultural Communication: have a global vision and good international communication ability, have fluent listening, speaking, reading and writing skills in foreign languages, and understand the international frontier direction and development trend of geosciences; have the ability of team cooperation and certain organization and management ability.

6. Independent Learning and Creativity: possess a sense of lifelong learning and strong independent learning ability; be able to actively carry out independent learning in accordance with their own development and social needs; have a strong sense of creativity, and can actively carry out innovative practices and explorations based on an understanding of the frontiers of geosciences, national strategies and international situation.

Graduation Requirements and Pathways:

No	Graduation Requirements	Pathways (Teaching Process)
1	Moral & humanistic quality: Have a firm political stance and a strong sense of social responsibility; have good psychological and moral qualities and a correct outlook on life and values; obtain a certain degree of humanistic and artistic qualities; and have a professional spirit of hard work, simplicity, and pragmatism.	①Classroom Teaching: Ideological and Moral Cultivation and legal Foundation, Situation and Policy, Introduction to Mao Zedong Thought and the Theoretical System of Socialism with Chinese Characteristics, Labor Practice, College Chinese, Traditional Culture and Chinese and Western Culture Elective Courses, Philosophy Foundation, Aesthetics and Art Elective Courses ②Extracurricular Learning: Classic reading and sharing, humanities lectures, social surveys, etc.
2	Scientific literacy and critical thinking: Have a solid foundation in mathematics, physics, chemistry, biology and information science and the ability to analyze and solve problems, with strong logical thinking and critical thinking ability.	①Classroom Teaching: Advanced Mathematics and Geoscience Application, Linear Algebra and Geoscience Application, Probability Theory and Mathematical Statistics and Geosciences Application, College Physics and Geosciences Application, Physics Experiment, General Biology, College Chemistry and Geoscience Application, Chemistry Experiment, Logic, etc. ②Extracurricular Learning: Competition activities such as Mathematical Modeling, Innovative Design of Physical Experiments, Innovative Design of Chemical Experiments, and a series of popular science activities

No	Graduation Requirements	Pathways (Teaching Process)
3	Professional foundation: Have a good view of Earth system science, establish a knowledge system of Earth materials, geochemistry, geophysics, Earth observation, Earth surface system, Earth environment and life evolution; master the basic theories and fundamentals of earth system science; have a mindset of earth system science; and have the basic knowledge and skills to engage in research work in various fields of Earth science.	①Classroom Teaching: Introduction to Earth System Science (basic course); major core courses such as Earth Surface System Science, Deep Earth Environment and Life Process, and Deep Earth Science; major elective courses such as Introduction to Atmospheric Science, Fundamentals of Oceanography, Introduction to Environmental Science, Economic Geography, Introduction to Geophysics and Spatial Information, and Environmental Planning and Management; Field geological practice in Beidaihe and Zhoukoudian, and classic geological route practice at home and abroad ②Extracurricular Learning: Series of academic reports and exchanges such as "Mt. Everest Forum", "Earth System Science Forum" and "Famous Experts Forum"
4	Research and practical ability: Understand the frontier and development trend of geosciences, have strong comprehensive analysis ability; master the basic methods of field geological work, can use common analytical instruments and obtain data, understand the computer simulation technology commonly used in the field of earth science; proficiently master the programming technology of at least one computer language, can skillfully acquire, process and express information, have the skills of big data acquisition and analysis, have the ability to engage in scientific research and the experience of carrying out scientific research activities.	①Classroom Teaching: Beidaihe and Zhoukoudian Field Geological Practice, Classic Geological Route Practice at Home and Abroad, Scientific Paper Writing, Python Language Program Course Design, Artificial Intelligence and other related courses ②Extracurricular Learning: Scientific research projects: joining the tutor's scientific research team and participated in scientific research projects, organizing teams freely to start innovative research projects, and participate in 1-2 academic conferences; college students' scientific and technological thesis reports, and college students' innovation and entrepreneurship training programs.
5	International Vision and Intercultural Communication: Have a global vision and good international communication ability, have fluent listening, speaking, reading and writing skills in foreign languages, and understand the international frontier direction and development trend of geosciences; have the ability of team cooperation and certain organization and management ability.	①Classroom Teaching: College English, bilingual teaching of selected specialty courses ②Extracurricular Learning: Literature reading in English, seminars by English-speaking experts, interactions with international students, visits and exchanges at famous overseas universities
6	Independent Learning and Creativity: Possess a sense of lifelong learning and strong independent learning ability; be able to actively carry out independent learning in accordance with their own	①Classroom Teaching: Problem-oriented classroom teaching, student-centered seminar discussion ②Extracurricular Learning: Scientific research training, practical ability

No	Graduation Requirements	Pathways (Teaching Process)
	development and social needs; have a strong sense of creativity, and can actively carry out innovative practices and explorations based on an understanding of the frontiers of geosciences, national strategies and international situation.	training, social investigation, discipline competition, academic report and discussion, etc.

Major Disciplines: Geology

Core Courses: Introduction to Earth System Science; Earth Surface System Science, Deep-time Environmental and Biological Processes, Deep-Earth Science, Modern Techniques in Geosciences, Interdisciplinary Courses

Lab Experiments: Identification of minerals and rocks (thin section and hand specimen), fossil identification, tectonic and geodynamic analysis

Practical Work: Primary Field Training at Beidaihe, Geological Mapping at Zhoukoudian, Comprehensive Field Geology Training at Zigui, International Geological Field Trips, Scientific Research Training, Practice for Graduation, Thesis for Graduation

Credits Required for Graduation: 173.5

Duration & Degree Granted: Four years, Bachelor of Science

Recommended Minors: Geography Science, Geological Engineering, Marine Science, Environmental Engineering

Related Specialties: Geochemistry, Geophysics
